- B. The 'incident management' practice should use a single process regardless of the impact of the incident
- C. Low impact incidents should be resolved efficiently so the resource required is reduced
- D. Incidents with the lowest impact should be resolved first

Answer: C

NEW QUESTION 289

- (Exam Topic 3)

Which Practice includes management of workarounds and known errors?

- A. Monitoring and event management
- B. Service configuration management
- C. Problem management
- D. Incident management

Answer: C

Explanation:

What is problem management?

The purpose of problem management is to reduce the likelihood and impact of incidents by identifying actual and potential causes of incidents, and managing workarounds and known errors.

Problems are related to incidents, but it is important to differentiate them in the way they are managed:

Incidents have an impact on users or business processes, and must be resolved so that normal business activity can take place.

Problems are the causes of incidents therefore they require investigation and analysis to identify the causes, develop workarounds, and recommend longer-term resolution. This reduces the number and impact of future incidents.

NEW QUESTION 292

- (Exam Topic 3)

Which is part of the definition of a customer?

- A. The role that defines the requirements for a service
