

The-Open-Group

Exam Questions OGEA-101

TOGAF Enterprise Architecture Part 1 Exam (English)

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

What provides context for architecture work, by describing the needs and ways of working employed by the enterprise?

- A. Architecture Contracts
- B. Business principles business goals, and business drivers
- C. Strategy and vision
- D. Stakeholder needs

Answer: B

Explanation:

Business principles business goals, and business drivers provide context for architecture work, by describing the needs and ways of working employed by the enterprise. They define what the enterprise wants to achieve, how it wants to operate, and what factors influence its decisions and actions. Reference: The TOGAF® Standard | The Open Group Website, Section 3.2 Preliminary Phase.

NEW QUESTION 2

Which of the following best describes the purpose of the Architecture Roadmap?

- A. It provides for effective communication of the end architecture project to the stakeholders
- B. It is sent from the sponsor and triggers the start of an architecture development cycle
- C. It forms the basis of a contractual agreement between the sponsor and the architecture organization
- D. It lists work packages on a timeline showing progress towards the Target Architecture

Answer: D

Explanation:

The purpose of the Architecture Roadmap is to provide a high-level view of how the Baseline Architecture will transition to the Target Architecture over time. It lists work packages on a timeline showing progress towards the Target Architecture, as well as dependencies, risks, and benefits. The Architecture Roadmap forms part of the Implementation and Migration Plan and guides the execution of the architecture projects. References: <https://pubs.opengroup.org/architecture/togaf9-doc/arch/chap20.html>

NEW QUESTION 3

Complete the sentence. The architecture domains that are considered by the TOGAF standard as subsets of an overall enterprise architecture are Business, Technology,

- A. Logical and Physical
- B. Information and Data
- C. Capability and Segment
- D. Application and Data

Answer: D

Explanation:

These domains provide a consistent way to describe and understand the architecture from different perspectives, such as business, information, and technology¹².

Each domain has its own set of concepts, models, views, and artifacts that define the structure and behavior of the architecture within that domain¹². The other options are incorrect because:

- Logical and Physical are not architecture domains, but rather levels of abstraction that can be applied to any domain. Logical architecture describes the functionality and behavior of the system, while physical architecture describes the implementation and deployment of the system³.
 - Information and Data are not distinct architecture domains, but rather aspects of the same domain. Information architecture describes the meaning and context of the data, while data architecture describes the structure and format of the data⁴.
 - Capability and Segment are not architecture domains, but rather levels of granularity that can be applied to any domain. Capability architecture describes the current and desired states of a specific business capability, while segment architecture describes a subdivision of the enterprise that has a clear business focus⁵.
- References: 1: The TOGAF Standard, Version 9.2 - Definitions 2: TOGAF® Standard — Introduction - Definitions 3: [Logical vs Physical Architecture] 4: [Information Architecture vs Data Architecture] 5: [The TOGAF Standard, Version 9.2 - Applying the ADM Across the Architecture Landscape]

NEW QUESTION 4

Consider the following ADM phases objectives.

	Objective
1	Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
2	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
3	Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABBs
4	Ensure conformance with the Target Architecture by implementation projects

Which phase does each objective match?

- A. 1F-2G-3F-4F
- B. 1E-2F-3E-4G
- C. 1G-2E-3F-4E
- D. 1F-2F-3E-4G

Answer: B

Explanation:

1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F: To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented

Reference: The TOGAF® Standard | The Open Group Website, Section 3.2 ADM Phases.

NEW QUESTION 5

What are the following activities part of?

- Initial risk assessment
- Risk mitigation and residual risk assessment
- Risk monitoring

- A. Risk Management
- B. Phase A
- C. Security Architecture
- D. Phase C

Answer: A

Explanation:

The following activities are part of Risk Management:

- ? Initial risk assessment
- ? Risk mitigation and residual risk assessment
- ? Risk monitoring

Risk Management is the process of identifying, assessing, and responding to risks that may affect the achievement of the enterprise's objectives. Risk Management involves balancing positive and negative outcomes resulting from the realization of either opportunities or threats. Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.3 Risk Management.

NEW QUESTION 6

What is used to structure architectural information in an orderly way so that it can be processed to meet stakeholder needs?

- A. A Stakeholder Map
- B. An Architecture Framework
- C. Content Metamodel
- D. An EA Library

Answer: C

Explanation:

? A content metamodel is a formal structure that defines the types of entities and relationships that are used to capture, store, filter, query, and represent architectural information in a way that supports consistency, completeness, and traceability¹².

? A stakeholder map is a tool that identifies and analyzes the key stakeholders and their interests, influence, and expectations in relation to the architecture³. It is not used to structure architectural information, but rather to understand the stakeholder needs and concerns.

? An architecture framework is a set of principles, guidelines, standards, and tools that provide a common structure and methodology for developing architectures⁴. It is not used to structure architectural information, but rather to guide the architecture development process and ensure alignment with the business strategy and objectives.

? An EA library is a repository that stores and manages the architecture artifacts, deliverables, and other relevant information produced and consumed during the architecture development and governance. It is not used to structure architectural information, but rather to provide access, security, and version control for the architecture content.

References: 1: The TOGAF Standard, Version 9.2 - Content Metamodel 2: TOGAF 9.2 Content Metamodel Framework - A Quick Guide - KnowledgeHut 3: The

TOGAF Standard, Version 9.2 - Stakeholder Management 4: The TOGAF Standard, Version 9.2 - Architecture Framework : The TOGAF Standard, Version 9.2 - Architecture Repository

NEW QUESTION 7

Complete the following sentence:

Presenting different _____ and _____ to stakeholders helps architects to extract hidden agendas principles and requirements that could impact the final Target Architecture

- A. Alternatives Trade-offs
- B. Solutions Applications
- C. Architecture Views Architecture Viewpoints
- D. Business Scenarios Business Models

Answer: C

Explanation:

According to the TOGAF Standard, an architecture view is a representation of a system from the perspective of a related set of concerns¹. An architecture viewpoint is a specification of the conventions for a particular kind of architecture view¹. Presenting different architecture views and architecture viewpoints to stakeholders helps architects to extract hidden agendas, principles, and requirements that could impact the final target architecture. This is because different stakeholders may have different concerns and interests in the system, and by showing them how the system addresses their concerns from different perspectives, the architects can elicit more feedback and validation from them². For example, a business stakeholder may be interested in the business architecture view, which focuses on the business processes, functions, and capabilities of the system³. A security stakeholder may be interested in the enterprise security view, which addresses the security aspects of the system, such as confidentiality, integrity, and availability³. By presenting these views to the respective stakeholders, the architects can ensure that the system meets their expectations and needs, and also identify any potential issues or gaps that may affect the target architecture. References: 1: The TOGAF Standard, Version 9.2 - Architectural Artifacts - TheOpen Group¹; 2: Understanding TOGAF Views and Viewpoints in Enterprise Architecture²; 3: Developing Architecture Views - The Open Group⁴

NEW QUESTION 8

According to the TOGAF standard, what term describes an individual with an interest in a system?

- A. stakeholder
- B. consumer
- C. lead architect
- D. sponsor

Answer: A

Explanation:

According to the TOGAF Standard, 10th Edition, a stakeholder is ??an individual with an interest in a system?? ¹. A stakeholder can be anyone who is affected by the system, or who can influence or be influenced by the system. Stakeholders can have different roles, perspectives, and concerns regarding the system, and they can be internal or external to the organization. Stakeholder management is a technique that helps to identify, analyze, and engage the stakeholders of an architecture project, and to address their needs and expectations ². The other options are not correct, as they are not the term used by the TOGAF Standard to describe an individual with an interest in a system. A consumer is ??an individual or group that uses a product or service?? ¹. A lead architect is ??an individual who is responsible for leading the development of an architecture?? ¹. A sponsor is ??an individual who provides funding and support for an architecture project?? ¹. References: 1: TOGAF Standard, 10th Edition, Part I: Introduction, Chapter 3: Definitions. 2: TOGAF Standard, 10th Edition, Part III: ADM Guidelines and Techniques, Chapter 24: Stakeholder Management.

NEW QUESTION 9

Which of the following describes the practice by which the enterprise architecture is managed and controlled at an enterprise-wide level?

- A. Corporate governance
- B. Architecture governance
- C. IT governance
- D. Technology governance

Answer: B

Explanation:

According to the TOGAF Standard, 10th Edition, architecture governance is ??the practice by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level?? ¹. Architecture governance ensures that the architecture development and implementation are aligned with the strategic objectives, principles, standards, and requirements of the enterprise, and that they deliver the expected value and outcomes. Architecture governance also involves establishing and maintaining the architecture framework, repository, board, contracts, and compliance reviews ¹. The other options are not correct, as they are not the term used by the TOGAF Standard to describe the practice by which the enterprise architecture is managed and controlled at an enterprise-wide level. Corporate governance is ??the system by which an organization is directed and controlled?? ², and it covers aspects such as leadership, strategy, performance, accountability, and ethics. IT governance is ??the system by which the current and future use of IT is directed and controlled?? ², and it covers aspects such as IT strategy, policies, standards, and services. Technology governance is ??the system by which the technology decisions and investments are directed and controlled?? ³, and it covers aspects such as technology selection, acquisition, deployment, and maintenance. References: 1: TOGAF Standard, 10th Edition, Part VI: Architecture Governance, Chapter 44: Introduction. 2: TOGAF Standard, 10th Edition, Part I: Introduction, Chapter 3: Definitions. 3: TOGAF Series Guide: Using the TOGAF Framework to Define and Govern Service-Oriented Architectures, Part II: Using the TOGAF Framework to Define and Govern Service-Oriented Architectures, Chapter 5: Technology Governance.

NEW QUESTION 10

Which of the following statements about architecture partitioning are correct*?

- 1 Partitions are used to simplify the management of the Enterprise Architecture
- 2 Partitions are equivalent to architecture levels
- 3 Partitions enable different teams to work on different element of the architecture at the same time.
- 4 Partitions reflect the organization's structure

- A. 2 & 3
- B. 1 & 3
- C. 1 & 4
- D. 2 & 4

Answer: B

Explanation:

Statements 1 and 3 about architecture partitioning are correct. Architecture partitioning is the technique of dividing an architecture into smaller and more manageable parts that can be developed, maintained, and governed independently. Partitions are used to simplify the management of the Enterprise Architecture and to enable different teams to work on different elements of the architecture at the same time. Partitions are not equivalent to architecture levels, which are different degrees of abstraction or detail in an architecture. Partitions do not necessarily reflect the organization's structure, which may change over time or differ from the architecture's scope and boundaries. Reference: The TOGAF® Standard | The Open Group Website, Section 2.5 Architecture Partitioning.

NEW QUESTION 10

In which phase(s) of the ADM would you deal with the actions resulting from a transformation readiness assessment?

- A. Phase F
- B. Phase G
- C. Phase E and F
- D. Phase A

Answer: C

Explanation:

According to the TOGAF Standard, 10th Edition, a transformation readiness assessment is a technique that evaluates the preparedness of the organization to undergo a change, and identifies the actions needed to increase the likelihood of a successful outcome. A transformation readiness assessment can be conducted in Phase E: Opportunities and Solutions, and the actions resulting from it can be dealt with in Phase F: Migration Planning 1. In Phase E, the transformation readiness assessment can help to identify the major implementation challenges and risks, and to define the critical success factors and key performance indicators for the architecture project. In Phase F, the actions resulting from the transformation readiness assessment can help to develop a detailed and realistic migration plan, and to address the gaps, issues, and dependencies that may affect the transition to the target architecture 1. References: 1: TOGAF Standard, 10th Edition, Part III: ADM Guidelines and Techniques, Chapter 29: Business Transformation Readiness Assessment.

NEW QUESTION 13

Consider the following statement:

According to the TOGAF Standard a governed approach of a particular deliverable will ensure a system of continuous monitoring to check integrity changes decision-making and audit of all architecture-related activities
Which deliverable is being referred to?

- A. An Architecture Contract
- B. The Architecture Definition Document
- C. The Architecture Vision
- D. The Statement of Architecture Work

Answer: A

Explanation:

An Architecture Contract is a deliverable that specifies the responsibilities and obligations of the parties involved in the implementation and governance of an architecture. It ensures a system of continuous monitoring to check integrity changes decision-making and audit of all architecture-related activities. Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.4 Architecture Contracts.

NEW QUESTION 16

Complete the sentence Business Transformation Readiness Assessment is .

- A. a joint effort between corporate staff lines of business and IT planners
- B. to ensure the active support of powerful stakeholders
- C. a way to put building blocks into context thereby supporting re-usable solutions
- D. widely used to validate an architecture that is being developed

Answer: A

Explanation:

Business Transformation Readiness Assessment is a joint effort between corporate staff lines of business and IT planners to evaluate the readiness of the organization to undergo change. It involves assessing factors such as vision, commitment, capacity, capability, culture, and motivation that may influence the success of a business transformation initiative. Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.2 Business Transformation Readiness Assessment.

NEW QUESTION 17

Which of the following best describes the class of information known as the Reference Library within the Architecture Repository?

- A. Guidelines and templates used to create new architectures
- B. Specifications to which architectures must conform
- C. A record of the governance activity across the enterprise
- D. Processes to support governance of the Architecture Repository

Answer: A

Explanation:

The class of information known as the Reference Library within the Architecture Repository contains guidelines and templates used to create new architectures. The Reference Library provides a set of resources that can be leveraged or customized for specific architecture development purposes. It includes generic building blocks, patterns, models, standards, frameworks, methods, techniques, best practices, etc. Reference: The TOGAF® Standard | The Open Group Website, Section 2.4 Architecture Repository.

NEW QUESTION 22

What does the TOGAF ADM recommend for use in developing an Architecture Vision document?

- A. Requirements Management
- B. Architecture Principles
- C. Gap Analysis
- D. Business Scenarios

Answer: D

Explanation:

Business scenarios are a technique recommended by the TOGAF ADM for use in developing an Architecture Vision document¹². Business scenarios are a means of capturing the business requirements and drivers, the processes and actors involved, and the desired outcomes and measures of success³⁴. Business scenarios help to create a common vision and understanding among the stakeholders, and to identify and validate the architecture requirements. Business scenarios also provide a basis for analyzing the impact and value of the proposed architecture. References:

- The TOGAF Standard, Version 9.2 - Phase A: Architecture Vision - The Open Group
- TOGAF® Standard — Introduction - Phase A: Architecture Vision
- The TOGAF Standard, Version 9.2 - Definitions - The Open Group
- Business Scenarios - The Open Group
- [The TOGAF Standard, Version 9.2 - Architecture Requirements Specification - The Open Group]
- [The TOGAF Standard, Version 9.2 - Architecture Vision - The Open Group]
- [The TOGAF Standard, Version 9.2 - Business Transformation Readiness Assessment - The Open Group]

NEW QUESTION 26

Consider the following statements:

- * 1. Each contracted party is required to act responsibly to the organization and its stakeholders.
- * 2. All decisions taken, processes used, and their implementation will not be allowed to create unfair advantage to any one particular party.
- * 3. Digital Transformation and operations will be more effective and efficient.
- * 4. Strategic decision-making by C-Level executives and business leaders will be more effective.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 1 & 2
- B. 2 & 3
- C. 3 & 4
- D. 1 & 4

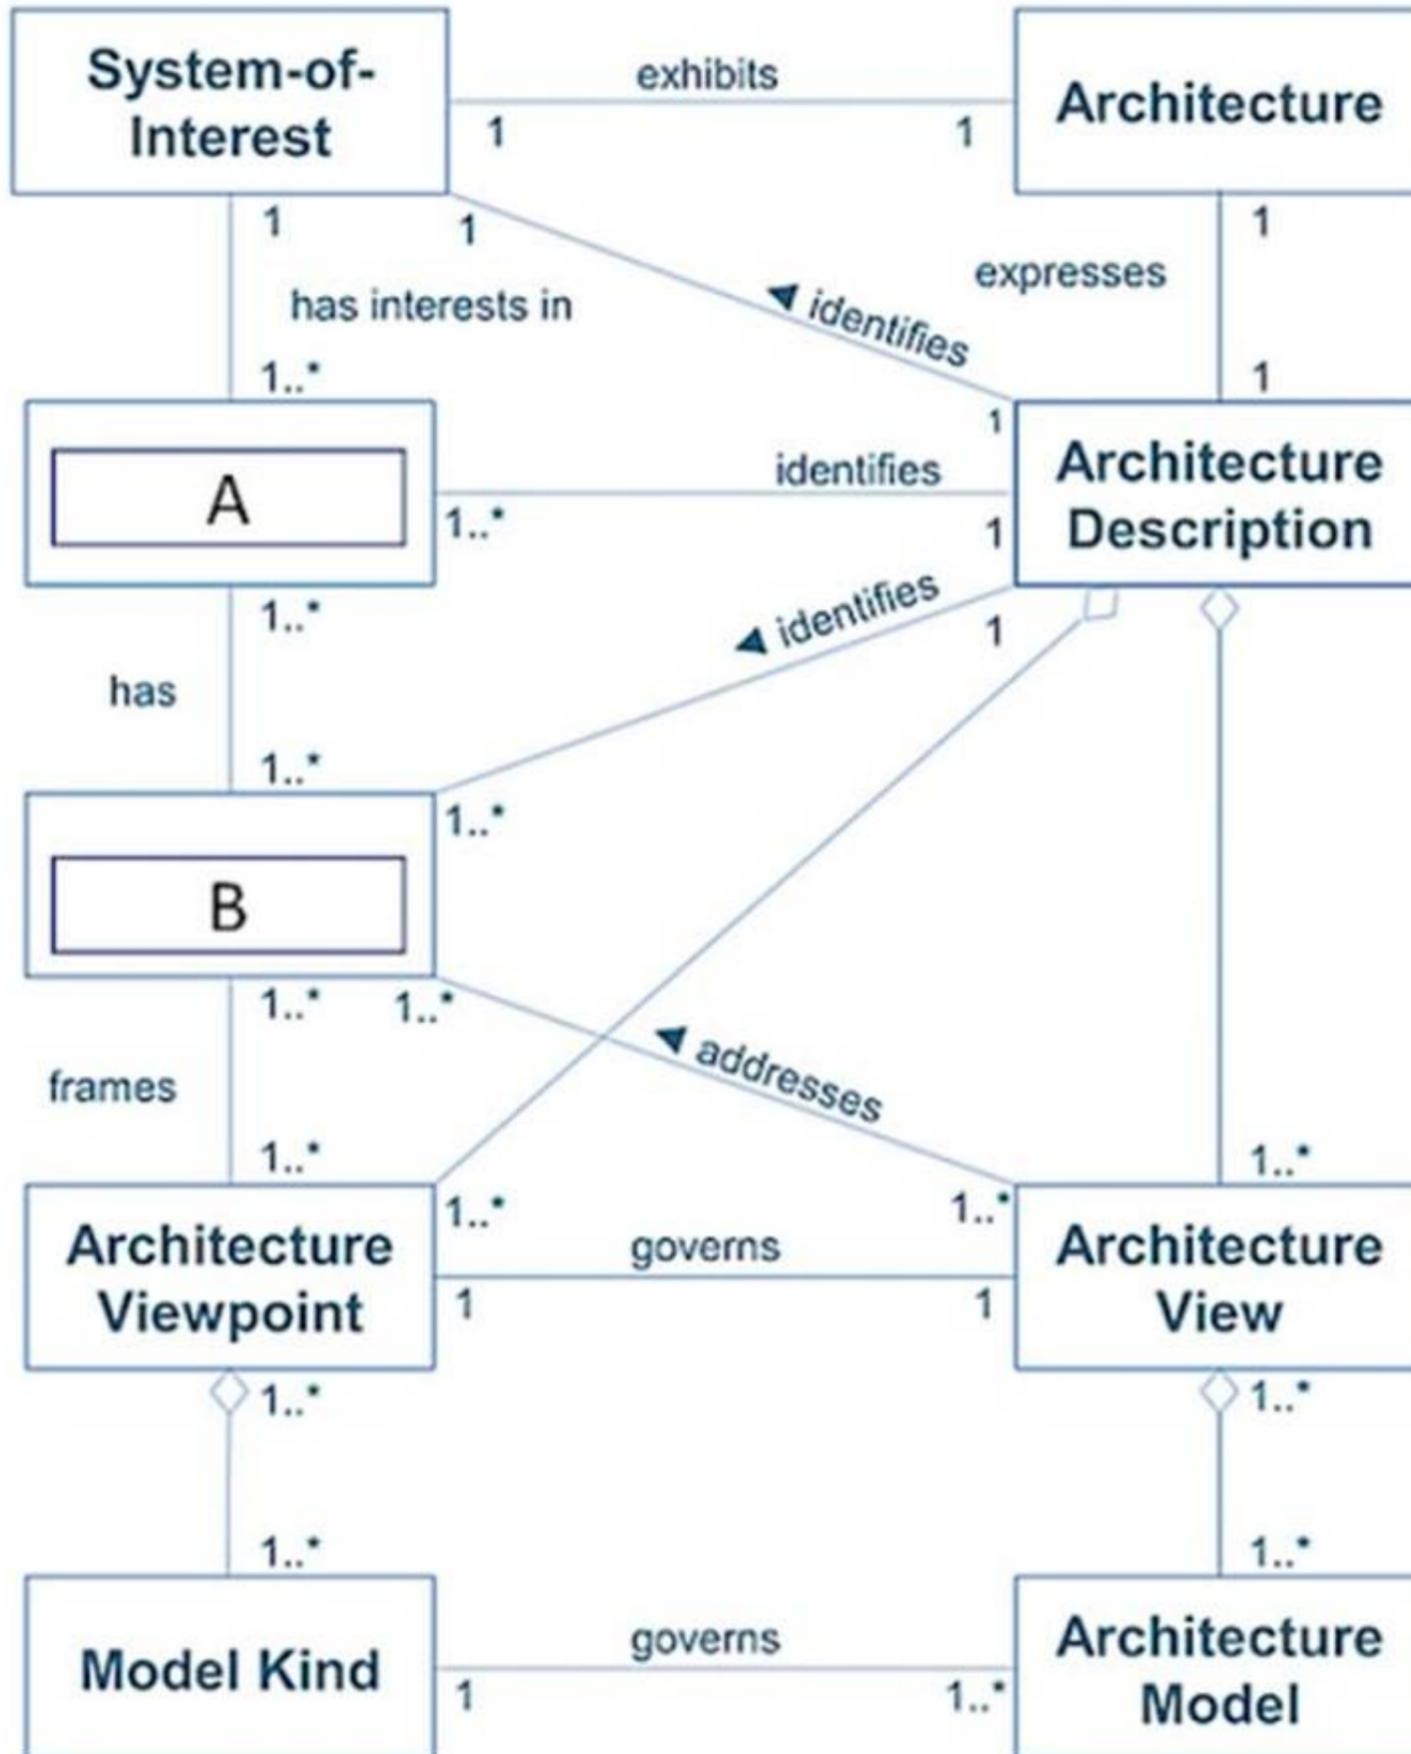

Answer: A

Explanation:

Architecture governance is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. Architecture governance provides the means to establish, monitor, and control the architecture development and implementation processes, and to resolve any issues or conflicts that may arise. Architecture governance also ensures that all stakeholders are represented and involved in the decision-making process, and that their interests and concerns are balanced and aligned. Statements 1 and 2 highlight the value and necessity for architecture governance to be adopted within organizations, as they emphasize the importance of responsibility, accountability, fairness, and transparency in the architectural activities. Statements 3 and 4 are more related to the benefits and outcomes of having a good enterprise architecture, rather than the governance aspect. References: : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 50: Architecture Governance : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 29: Architecture Governance

NEW QUESTION 29

Exhibit:

Consider the image showing basic architectural concepts. What are items A and B?

- A. A-Candidate Architecture, B-Trade-off
- B. A-User, B-Requirement
- C. A-Stakeholder, B-Concern
- D. A-Base Architecture, B-Target Architecture

Answer: C

Explanation:

In the context of TOGAF, a stakeholder is any individual, team, or organization who has interests in, or concerns relative to, the outcome of the architecture. Concerns are those interests which pertain to any aspect of the system's functioning, development or operation, including considerations such as performance, reliability, and security. References:

•The TOGAF Standard, Version 9.2 - Definitions - The Open Group

NEW QUESTION 33

What can architects present to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture?

- A. Solutions and Applications
- B. Alternatives and Trade-offs

- C. Business Scenarios and Business Models
- D. Architecture Views and Architecture Viewpoints

Answer: D

Explanation:

? According to the TOGAF Standard, Version 9.2, an architecture view is a representation of a system from the perspective of a related set of concerns¹. It consists of one or more architecture models that demonstrate how the system addresses the stakeholder concerns¹.

? An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns¹. It defines

the perspective, scope, notation, and techniques for creating an architecture view of a system¹.

? Architects can present architecture views and viewpoints to stakeholders to extract

hidden agendas, principles, and requirements that could impact the final Target Architecture, because^{2,3}:

References:

? 1: The TOGAF Standard, Version 9.2, Chapter 22: Architecture Views, Viewpoints, and Stakeholders

? 2: The TOGAF Standard, Version 9.2, Chapter 4: Introduction to Part II, Section 4.2: What is an Architecture Framework?

? 3: The TOGAF Standard, Version 9.2, Chapter 31: Architectural Artifacts, Section 31.1: Basic Concepts

NEW QUESTION 38

Consider the following ADM phases objectives.

	Objective
1	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
2	Ensure conformance with the Target Architecture by implementation projects
3	Ensure that the architecture development cycle is maintained
4	Ensure that the Architecture Governance Framework is executed

Which phase does each objective match?

- A. 1F-2G-3G-4H
- B. 1H-2F-3F-4G
- C. 1F-2G-3H-4H
- D. 1G-2H-3H-4F

Answer: B

Explanation:

? According to the TOGAF Standard, Version 9.2, the ADM phases and their objectives are as follows¹:

? Based on the above definitions, we can match each objective with the corresponding phase as follows:

References:

? 1: The TOGAF Standard, Version 9.2, Chapter 5: Architecture Development Method (ADM)

? 2: The TOGAF Standard, Version 9.2, Chapter 21: Architecture Change Management

? 3: The TOGAF Standard, Version 9.2, Chapter 20: Migration Planning

? 4: The TOGAF Standard, Version 9.2, Chapter 19: Implementation Governance

NEW QUESTION 40

Which of the following does the TOGAF standard describe as a package of functionality defined to meet business needs across an organization?

- A. An application
- B. A deliverable
- C. A solution architecture
- D. A building block

Answer: D

NEW QUESTION 43

Complete the following sentence. In the ADM, documents which are under development and have not undergone any formal review and approval process are called Documents which have been reviewed and approved are called

- A. "draft"- "finalized"
- B. "draft" - "approved"
- C. "concept" - "deliverable"
- D. "Version 0.1" - "Version 1.0"

Answer: B

Explanation:

According to the TOGAF Standard, 10th Edition, documents which are under development and have not undergone any formal review and approval process are

called draft documents, while documents which have been reviewed and approved are called approved documents 1. Draft documents are typically marked with a version number of 0.x, indicating that they are incomplete or provisional. Approved documents are typically marked with a version number of 1.0 or higher, indicating that they have been finalized and authorized. The other options are not correct, as they are not the terms used by the TOGAF Standard to distinguish between documents under development and documents that have been reviewed and approved. The terms *finalized*, *concept*, *deliverable*, and *Version 0.1* and *Version 1.0* are not specific to the TOGAF Standard, and they may have different meanings or interpretations in different contexts. References: 1: TOGAF Standard, 10th Edition, Part II: Architecture Development Method, Chapter 7: Applying Iteration to the ADM, Section 7.2.3 Document Categorization.

NEW QUESTION 46

Which of the following describes a purpose of Architecture Principles?

- A. To describe likely impacts resulting from successful deployment of the target architecture.
- B. To establish a common understanding of how to control the business in pursuit of strategic objectives
- C. To provide a better understanding about the enterprise's culture and values
- D. To form a contract between sponsoring organization and the enterprise architects

Answer: B

Explanation:

Architecture Principles are general rules and guidelines that inform and support the way in which an organization sets about fulfilling its mission. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions. One of the purposes of Architecture Principles is to establish a common understanding of how to control the business in pursuit of strategic objectives, by providing a framework for evaluating and agreeing on the changes that affect the enterprise's architecture³ References: 3: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 23: Architecture Principles : The TOGAF Standard, Version 9.2, Part IV: Architecture Content Framework, Chapter 31: Architecture Principles

NEW QUESTION 51

Which of the following supports the need to govern Enterprise Architecture?

- A. The Architecture Project mandates the governance of the target architecture
- B. The TOGAF standard cannot be used without executive governance
- C. Best practice governance enables the organization to control value realization
- D. The Stakeholders preferences may go beyond the architecture project scope and needs control

Answer: C

Explanation:

This statement best supports the need to govern Enterprise Architecture. Best practice governance enables the organization to control value realization by ensuring that architectures are aligned with the enterprise's strategy and objectives, meet the quality and performance requirements, and deliver the expected benefits and outcomes. The Architecture Project does not mandate the governance of the target architecture, but rather follows the governance framework established by the enterprise. The TOGAF standard can be used without executive governance, but it is recommended that executive sponsorship and support are obtained for successful architecture development and transition. The Stakeholders preferences may go beyond the architecture project scope and need control, but this is not the primary reason for governing Enterprise Architecture. Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.6 Architecture Governance.

NEW QUESTION 54

What are the following activities part of?

- . Risk classification
 - . Risk identification
 - . Initial risk assessment
-
- A. Security Architecture
 - B. Phase A
 - C. Phase G
 - D. Risk Management

Answer: D

Explanation:

Risk management is a generic technique that can be applied across all phases of the Architecture Development Method (ADM), as well as in the Preliminary Phase and the Requirements Management Phase². Risk management involves the following steps¹:

- Risk identification: This step involves identifying the potential risks that may affect the architecture project, such as technical, business, organizational, environmental, or legal risks. The risks can be identified through various sources, such as stakeholder interviews, workshops, surveys, checklists, historical data, or expert judgment.
- Risk classification: This step involves categorizing the risks based on their nature, source, impact, and priority. The risks can be classified according to different criteria, such as time, cost, scope, quality, security, or compliance. The classification helps in prioritizing the risks and allocating resources and efforts to address them effectively.
- Initial risk assessment: This step involves assessing the likelihood and impact of each risk, and determining the initial level of risk. The likelihood is the probability of the risk occurring, and the impact is the severity of the consequences if the risk occurs. The initial level of risk is the product of the likelihood and impact, and it indicates the urgency and importance of the risk. The initial risk assessment helps in identifying the most critical risks that need immediate attention and mitigation. References: 1: The TOGAF Standard, Version 9.2 - Risk Management 2: TOGAF ADM: Top 10 techniques – Part 9: Risk Management

NEW QUESTION 59

Which of the following is a responsibility of an Architecture Board?

- A. Determining the scope of an architecture compliance review
- B. Allocating resources for architecture projects
- C. Conducting assessments of the maturity level of architecture discipline within the organization
- D. Achieving consistency between sub-architectures

Answer: D

Explanation:

One of the key responsibilities of an Architecture Board within the context of TOGAF is to achieve consistency between sub-architectures. This board is typically responsible for overseeing the development and maintenance of the enterprise architecture, ensuring that it aligns with the organization's overall strategy and objectives. They play a critical role in ensuring that all sub-architectures (like Business Architecture, Data Architecture, Application Architecture, and Technology Architecture) work together cohesively and support the overall enterprise architecture vision and strategy.
