Exam Questions PL-200

Microsoft Power Platform Functional Consultant

https://www.2passeasy.com/dumps/PL-200/

NEW QUESTION 1
- (Exam Topic 1)
A guest asks about the start time of a specific scheduled event and wants to know what the snow conditions will be like during their stay.
You need to determine how to design the chat solution to answer those questions. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Scenario	Action
Identify and reference the company event a guest mentions.	Load the response into a variable / Use smart matching to load an entity into a topic / Load the extracted topic into a variable
Identify attributes for snow conditions.	Create a custom entity / Create a new topic / Create a new variable / Create an escalation

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface Description automatically generated
Box 1: Load the extracted topic into a variable
Power Virtual Agents uses entities to understand and identify a specific type of information from a user's responses. When saving the identified information to a variable, a variable type will be associated with it. The variable type is analogous with the entity.
In Power Virtual Agents, a topic defines a how a bot conversation plays out.
A topic has trigger phrases – these are phrases, keywords, or questions that a user is likely to type that is related to a specific issue – and conversation nodes – these are what you use to define how a bot should respond and what it should do.
Box 2: Create a custom entity
The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.
Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling

NEW QUESTION 2
- (Exam Topic 1)
You need to embed the check-in solution into the communication solution. To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

What must you use to embed the check-in solution?	Visual Studio / Power Apps Web Studio / AI Builder / Common Data Service
Where must the check-in solution be available within the communication solution?	chat section of the solution / Microsoft 365 Apps selection grid / in an embedded webpage / in a tab

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, application, Word Description automatically generated
Box 1: Power Apps Web Studio
Scenario: The check-in solution must continue to function if there are internet issues. If the self-service kiosks are not available, staff must be able to use the check-in solution from within their communication solution.
PowerApps Studio is a browser application used to edit your apps. PowerApps Studio includes a
drag-and-drop canvas in the center of the screen and a screen or object list pane on the left. Properties, Rules, and Advanced Properties for selected screens or controls are displayed in the right pane.
Box 2: in a tab
You can customize the Teams experience by adding Power Apps canvas apps to your channels in Teams using the PowerApps tab.

NEW QUESTION 3
- (Exam Topic 1)
You need to design the resort portal's email registration process.
Which solutions should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Implement the invitation code redemption process.	▼ Auto-populate the invitation code field on the sign-in screen from the email link. Embed the invitation code in the email link URL. Send the customer their username and temporary password in the email link.
Validate the user's email.	▼ Two-factor authentication Azure Active Directory authentication Social provider sign-in Invitation code sign-up

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 4
- (Exam Topic 1)
You need to create the FAQ solution content What should you do first?

A. AI Builder
B. Suggest topics
C. Automate
D. Trigger phrases

Answer: B

Explanation:
You need to make sure there are three main steps need to do while doing import FAQ and add the topic to your bot application.
> Import Suggested Topics from FAQ webpage.
> Add a topic.
> Enable the topics Reference:
https://social.technet.microsoft.com/wiki/contents/articles/53820.power-virtual-agents-faq-chatbot.aspx

NEW QUESTION 5
- (Exam Topic 1)
You need to design the guest check-in solution.
Which technologies should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.
You need to design the guest check-in solution.

Answer Area

Requirement	Technology
Develop the base check-in solution.	Xamarin app Power Apps portal Model-driven app Canvas app
Access the check-in solution on the check-in devices.	
Access the check-in solution on the check-in devices.	Traditional desktop application Web browser Power Apps mobile app Dynamics 365 for phones and tablets

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Canvas app,

Power Apps mobile app
https://docs.microsoft.com/en-us/power-apps/maker/canvas-apps/offline-apps

NEW QUESTION 6
- (Exam Topic 2)
You need to coordinate updates and deployment for managed solutions containing completed work without disrupting the system.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Deployment option for changes to an unrelated table

▼

Deploy a patch with the changes made from the current solution.
Deploy a full copy of the new solution with the changes using the upgrade option.
Deploy a full copy of the current solution with the changes using the upgrade option.

Deployment option for automation enhancements

▼

Deploy the new solution and then deploy a full copy of the original solution. Use the upgrade option for both deployments.
Deploy a full copy of the original solution and then deploy the new solution. Use the upgrade option for both deployments.
Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Deploy a patch with the changes made from the current solution. Scenario:
The Onsite Visit managed solution has a table that is not in the Verification Process Automation managed solution. This table must be upgraded prior to the go-live date without the other shared components.
Box 2: Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.
Scenario: All components required for the verification process must be included in a new solution. Corporate security requires that deployments to non-development environments must be automated using
service accounts.
Managed solutions are used to move customizations from the development environment to other higher-level environments. These solutions are created and maintained by the power users and provided to internal IT for deployment when they are ready.
Note:
Upgrade This is the default option and upgrades your solution to the latest version and rolls up all previous patches in one step. Any components associated to the previous solution version that are not in the newer solution version will be deleted. This is the recommended option as it will ensure that your resulting configuration state is consistent with the importing solution including removal of components that are no longer part of the solution.
Update This option replaces your solution with this version. Components that are not in the newer solution won't be deleted and will remain in the system. This option is not recommended as your destination environment will differ in configuration from your source environment and could cause issues that are difficult to reproduce and diagnose.
Reference: https://docs.microsoft.com/en-us/power-apps/maker/data-platform/update-solutions

NEW QUESTION 7
- (Exam Topic 2)
You need to configure a Power Automate flow to send the email with the results to the client. What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Control
Process qualification records for a service request.	▼
	Switch
	Condition
	Apply to Each
Evaluate a qualification.	▼
	Do until
	Condition
	Apply to Each

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Apply to each

You can use the Apply to each action to process a list of items periodically. Box 2: Do until
The Do Until control in Power Automate is a loop that repeatedly forces an action until a certain condition becomes true.
Reference: https://docs.microsoft.com/en-us/power-automate/apply-to-each https://blog.enterprisedna.co/do-until-loop-control-in-power-automate/

NEW QUESTION 8
- (Exam Topic 2)
You need to be able to move a Power Automate desktop flow used in the verification process to the testing environment.
What should you do?

A. Share a copy of the desktop flow with a member of internal IT.
B. Use the Export option in the flow to get the flow identifier and provide it to internal IT.
C. Send a copy of the desktop flow to a member of internal IT.
D. Create the desktop flow in a solution and provide it to internal IT.

Answer: D

Explanation:
Internal IT reports that the solution import to the test environment failed because of missing dependencies related to the flow for completing service requests.
Flows with PowerApps steps
Flows that were created via Power Automate in the PowerApps menu or flows that have PowerApps steps added have a different issue then other Power Automate flows. As of the writing of this blog these flows are not able to be imported into another environment. This means that if you create flows with Power Apps steps within them you will need to recreate them in your destination environment.
Reference: https://www.spyglassmtg.com/blog/power-platform-solution-export-and-import-issues

NEW QUESTION 9
- (Exam Topic 3)
You are creating tables for use with Microsoft Power components.
The display names of the tables must not be changed when the solution is promoted to the user acceptance testing environment.
You need to apply this restriction to the solution, Where should you make the changes?

A. Power Apps
B. Default solution
C. Segmented solution
D. Unmanaged solution
E. Managed solution

Answer: C

NEW QUESTION 10
- (Exam Topic 3)
You modify a model-driven app for a bicycle repair help desk. The model-driven app is for help desk users when customers have an issue with their bicycle. After you add a custom table named bicycle, you configure the table for Microsoft Dataverse search. The table will contain information from callers about their bicycles. The account table is related to the custom table. Contact information is brought over to the custom table.
You add the following columns to the table:

≫ Bicycle type

≫ Tire brand

≫ Special equipment
Users must be able to perform the following types of searches:

≫ Search for all customers who have a bicycle type of Contoso and live in Florida.

≫ Search all tables for any record that contains the word broken.

≫ You need to decide which type of search will give you the results desired.
Which search should you configure? To answer, drag the appropriate search types to the correct requirements. Each search type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Search types	Answer Area	
Dataverse search	**Requirements**	**Search type**
Quick find	Customer with bicycle type of Contoso and lives in Florida	
Advanced find	Includes the word **broken** across tables	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Text Description automatically generated
Box 1: Advanced find
Operators for advanced search: Lets you use simple Boolean operators in your search term and craft the query to get the results you want.
Box 2: Dataverse search

Dataverse search helps you quickly find what you're looking for. It delivers fast and comprehensive results across multiple tables in a single list, sorted by relevance.
Reference: https://docs.microsoft.com/en-us/power-apps/user/quick-find https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization

NEW QUESTION 10
- (Exam Topic 3)
You are a Dynamics 365 Customer Service developer. A salesperson creates a chart.
You need to ensure that the chart is available to all users on the team. What should you do?

A. Share the chart with the team.
B. Assign the chart to each person on the team.
C. Export the user chart to Power B
D. Import the chart as a Power BE visualization.
E. Export the user chart for import as a user chart.

Answer: A

NEW QUESTION 12
- (Exam Topic 3)
You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.
The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution: Enable Outlook integration
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead enable server-based SharePoint integration. Reference:
https://docs.microsoft.com/en-us/power-platform/admin/set-up-dynamics-365-online-to-use-sharepoint-online

NEW QUESTION 14
- (Exam Topic 3)
You are creating a Power Virtual Agents chatbot that uses multiple topics. Each user interaction can reference more than one topic.
You need to be able to capture a value in an initial topic and use it in subsequent topics. Which type of variable should you create?

A. Bot
B. Topic
C. Context

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot

NEW QUESTION 16
- (Exam Topic 3)
A company has a canvas app that includes the following screens: Screen1 and Screen2. The OnVisible property for Screen1 contains the following expression.
Set(AgeGroups, ["1-25", "26-54", "55+"])
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	○	○
AgeGroups is a collection.	○	○
You can use the Update function to change values in AgeGroups.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	○	⦾
AgeGroups is a collection.	○	⦾
You can use the Update function to change values in AgeGroups.	⦾	○

NEW QUESTION 19
- (Exam Topic 3)
A company collaborates by using Microsoft Teams.
You must create a Power Apps app directly from within a Teams channel. The app will be used by members of the channel to manage sales orders.
You need to create the app by using Dataverse for Teams. How should you create the app?

A. Create a canvas app by using a Power Apps personal app in Teams.
B. Create a canvas app by using the App Studio app.
C. Use the Power Apps web designer.
D. Create a model-driven app by using the App Studio app

Answer: B

Explanation:
You can create, edit, and delete canvas apps in Teams.
Note: With Power Apps Studio embedded in the Power Apps app in Teams and the new built-in data platform providing an easy-to-use, editable data table, you can quickly build apps based on custom data tables that are
Teams-specific and scenario-specific.
Reference: https://docs.microsoft.com/en-us/power-apps/teams/create-first-app https://docs.microsoft.com/en-us/power-apps/teams/create-apps-overview

NEW QUESTION 22
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:
» 0 - 17
» 18 - 25
» 26 - 35
» 36 - 55
» 55 - 100
You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Use Date and time for Identify in the question and then add branches that use conditional logic to
determine the age group.
Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 27
- (Exam Topic 3)
A company is building a Power Virtual Agents chatbot.
Users in the accounting department require access to collaborate with the building of the bot. Users in the sales department require access to only chat with the bot.
You need to configure the bot.
Which sharing options should you use? To answer, drag the appropriate sharing options to the correct requirements. Each sharing option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Sharing options		Answer Area	
Users		**Requirement**	**Sharing option**
Active Directory security groups		Users in the accounting department	
Everyone in the organization		Users in the sales department	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Sharing options

Answer Area

Users

Active Directory security groups

Everyone in the organization

Requirement	Sharing option
Users in the accounting department	Active Directory security groups
Users in the sales department	Users

NEW QUESTION 30
- (Exam Topic 3)
You need to design the FAQ solution to handle unknown responses.
Which component should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Component
Handle an unknown question from a guest in a conversation.	Escalate / Fallback topic / Failure path
Redirect a quest with an unknown question to a live staff member.	Power Apps / Power Virtual Agents web application / Microsoft Teams / Omnichannel for Dynamics 365 Customer Service

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/advanced-hand-off

NEW QUESTION 32
- (Exam Topic 3)
You are creating a business rule to implement new business logic.
You must apply the business logic to a canvas app that has a single screen named Screen1. You need to configure the scope for the business rule.
Which scope should you use?

A. All Forms
B. Entity
C. Screen1
D. Global

Answer: B

Explanation:
Note: Some terminology has changed. Entity is now Table. If you're building a Canvas app, you must use table (entity) as the scope.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION 33
- (Exam Topic 3)
Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

A. List view of the entity
B. Microsoft Visual Studio
C. Templates area
D. Maker portal

Answer: A

Explanation:
Edit a public or system view in app designer
You can change the way a public or system view is displayed by adding, configuring, or removing columns.

≫ In the Views list for a table, select the Show list of references down arrow Drop Down. Edit View.Graphical user interface, application Description automatically generated

≫ Next to the view you want to edit, select Open the View Designer Open view Designer. The view opens in the view designer.

When you edit a public or system view, you must save and publish your changes before they will be visible in the application.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer

NEW QUESTION 35
- (Exam Topic 3)
A company has locations in the United States, Brazil, India. and Japan. The company conducts financial transactions in all of these regions.
Financial transactions in Brazil are going to stop, but the office will remain open.
Users must longer be able to create records associated with the Brazilian currency. Historical records must remain intact
You need to configure Microsoft Dataverse to meet the requirement
What should you do?

A. Rename the Brazilian currency.
B. Delete the Brazilian currency record.
C. Disable the Brazilian language pack
D. Deactivate the Brazilian currency record.

Answer: D

Explanation:
You can't delete currencies that are in use by other records; you can only deactivate them. Deactivating currency records doesn't remove the currency information stored in existing records, such as opportunities or orders. However, you won't be able to select the deactivated currency for new transactions.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/manage-transactions-with-multiple-currencies

NEW QUESTION 36
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:
≫ 0 - 17
≫ 18 - 25
≫ 26 - 35
≫ 36 - 55
≫ 55 - 100
You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Create a custom Age group entity and synonyms for each individual age in the corresponding item.
Use Age group for Identify in the question.
Does this meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 37
- (Exam Topic 3)
You attempt to deactivate several currencies in a Microsoft Dataverse environment. You are not able to deactivate one of the currencies.
You need to determine why you cannot deactivate the currency. What is the reason?

A. You are not the currency record owner.
B. The currency is used by an active business process.
C. The currency is the base currency.
D. The currency is used by another record.

Answer: C

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/org-service/web-service-error-codes https://docs.microsoft.com/en-us/power-platform/admin/manage-transactions-with-multiple-currencies

NEW QUESTION 38
- (Exam Topic 3)
A company has a Power Apps app.
The app must meet the following requirements:
• Managers assign lead records to the sales department. A new phone call record must be created if a lead record has no activities.
• An email must be sent to the manager if the phone call record created is not completed after one day. A classic workflow must run when a lead record is

assigned.
You need to configure the check conditions for the workflow. NOTE: Each correct selection is worth one point.

Answer Area

Condition	Value
Number of activities for new phone call record.	0
	0
	1
	Process Activity Count
Duration for email sent to manager.	Lead Created On + 1 Day ▼
	1 Day
	Lead Created On + 1 Day
	Lead Modified On + 1 Day

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Condition	Value
Number of activities for new phone call record.	0
	0
	1
	Process Activity Count
Duration for email sent to manager.	Lead Created On + 1 Day ▼
	1 Day
	Lead Created On + 1 Day
	Lead Modified On + 1 Day

NEW QUESTION 41
- (Exam Topic 3)
A bank uses Power BI visualizations to help determine whether they should loan money to a customer. The bank has three different visuals that are part of a
Power BI report. The bank uses a set of four risk variables that indicate whether the customer is creditworthy.
You must create a mechanism so that bank employees can change the values of the four risk variables. Changes to the value of any variable must cause the three
visualizations to update.
You need to create the solution.
Which action should you perform? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Action
Update the visualizations when users change the values of the risk variables.	▼
	Embed a canvas app in a Power BI report.
	Embed a Power BI report in a model-driven app.
	Embed a model-driven app in a Power BI report.
Ensure that users can adjust the values of the four risk variables that contribute to a customer's credit risk.	▼
	Use Power BI tiles.
	Use Power Apps visuals.
	Use the Power BI service.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Embed a Power BI report in a model-driven app
You can embed a Power BI report in a model-driven app main form. Box 2: Use the Power BI service.
The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution. Power BI automatically refreshes the app's data
displayed. With Power BI Desktop or Microsoft Excel, Power Query for authoring reports and Power BI for sharing dashboards and refreshing data from model-
driven apps,
your users have a powerful way to work with your app's data.
Reference:
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/embed-powerbi-report-in-system-form
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/use-power-bi

NEW QUESTION 42
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.
The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution: Enable OneDrive for Business.
Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 47
- (Exam Topic 3)
A company is planning to create a Power Virtual Agents bot. The bot has the following requirements:
• The bot must provide address information for the company.
• The bot must be available from Microsoft Teams and from the internet website of the company. You need to configure the bot. Which component should you use?

A. Skill
B. Composer
C. Template
D. Channel

Answer: D

Explanation:
To make the bot available from Microsoft Teams and from the company's internet website, you need to configure the channels for the bot. Power Virtual Agents uses channels to connect the bot to different communication platforms such as Microsoft Teams, Skype, Facebook, and more. By configuring the appropriate channels for the bot, you can make it available on those platforms and allow users to interact with the bot from those locations.
You can configure channels by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Channels" tab, where you can add the channels which you want the bot to be available on.
Reference: https://docs.microsoft.com/en-us/power-virtual-agents/channels-overview

NEW QUESTION 49
- (Exam Topic 3)
The owner of a company needs to know who signs into the system. You need to ensure that the owner can view the user audit logs.
Where does each action need to be performed? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

Action	Location
Activate user auditing.	System Settings / Personal Settings / Customize the System / Microsoft 365 Compliance
View the user audit logs.	Advanced Find / Individual record / User Summary report / Microsoft 365 Compliance

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/audit-data-user-activity

NEW QUESTION 50
- (Exam Topic 3)
A company uses Microsoft Teams. You plan to create a Power Apps app for Microsoft Teams. You need to determine the environment that will used by the app. Which environment will the app use?

A. An existing Dataverse environment that you select.
B. An existing Dataverse for Teams environment that you select.
C. A Dataverse environment that is automatically created for the team.
D. A Dataverse for Teams environment that is automatically created for the team.

Answer: D

Explanation:

The Dataverse for Teams environment is automatically created for the selected team when you create an app or bot in Microsoft Teams for the first time or install a Power Apps app from the app catalog for the first time. The Dataverse for Teams environment is used to store, manage, and share team-specific data, apps, and flows. Each team can have one environment, and all data, apps, bots, and flows created with the Power Apps app inside a team are available from that team's Dataverse for Teams database.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/about-teams-environment

NEW QUESTION 54
- (Exam Topic 3)
A company uses Power Apps.
Users must be able to view only the address1 columns in the Account table.
You need to ensure other address columns are not visible to users when creating views and filters. What should you do?

A. Disable the Search option for the columns.
B. Create business rules to hide the other address columns.
C. Delete the other address columns from the table.
D. Use column-level security to remove read access to all users.

Answer: D

NEW QUESTION 59
- (Exam Topic 3)
A company creates a canvas app.
The app requires users to enter their social security number. The app should only display the last four digits when the user tabs to a different column.
You need to configure the app. Which option should you use?

A. Power Fx
B. Business rule
C. Business process flow
D. Power BI DAX

Answer: A

NEW QUESTION 60
- (Exam Topic 3)
A company uses a model-driven app with Microsoft Dataverse in a single environment
The company requires a canvas app that includes the same data as the model-driven app. You need to create the canvas app.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 63
- (Exam Topic 3)
A company uses Power Apps.
The company plans to create a canvas app that uses a responsive design. You need to configure the app.
Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Enable the lock orientation setting.

B. Configure the height and width properties by using a formula.
C. Disable the Scale to fit setting.
D. Configure the height and width properties by using drag handles.

Answer: BC

Explanation:
To create a canvas app that uses a responsive design in Power Apps, you should perform the following actions:
* B. Configure the height and width properties by using a formula: By using a formula to set the height and width properties, you can ensure that the app will respond to changes in screen size and orientation. For example, you can use the Width() and Height() functions to set the width and height properties based on the size of the screen.
* C. Disable the Scale to fit setting: The Scale to fit setting, when enabled, makes the app's content fit on the screen by scaling it down. To create a responsive app, this setting must be disabled.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/responsive-design https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-width

NEW QUESTION 64
- (Exam Topic 3)
You plan to add a Power Apps app to Microsoft Teams.
A Microsoft Dataverse for Teams environment has not been provisioned. You need to create a Dataverse for Teams environment.
Which two actions can you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Create a new environment in the Microsoft Power Platform Admin Center.
B. Create a new app in Teams.
C. Create an app permission policy in the Teams admin center.
D. Install an existing app in Teams.

Answer: BD

NEW QUESTION 66
- (Exam Topic 3)
A company uses a Microsoft Power Platform environment
The company plans to implement a Power Apps app. The application must meet the following requirements:
• Audit all user activity and only retain the audit logs for one year.
• Annually remove products that were created over a year ago. You need to configure the automated processes.
What should you configure? To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 67
- (Exam Topic 3)
You need to create a Power Automate desktop flow.
What are two possible ways to create the flow? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Record mouse and keyboard events.
B. Configure a pre-built template.
C. Use pre-built actions.
D. Create models by using Microsoft Visio.

Answer: AC

Explanation:
C: Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate you can automate tasks on the desktop as well as the Web.
A: Alternatively, you can use the two legacy methods of creating desktop flows: Windows recorder (V1) and Selenium ID. With these you record mouse and keyboard events.
Reference:
https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-flow https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-web

NEW QUESTION 72
- (Exam Topic 3)
A user has access to an existing Common Data Service database.
You need to ensure that the user can create canvas apps that consume data from Common Data Service. You must not grant permissions that are not required.
Which out-of-the-box security role should you assign to the user?

A. Environment Admin
B. System Customizer
C. Common Data Service User
D. Environment Maker

Answer: D

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/database-security#predefined-security-roles https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/data-platform-create-app

NEW QUESTION 73
- (Exam Topic 3)
A company creates a Power Automate cloud flow for a Power Apps app.
The cloud flow must send a daily email that contains a list of year-to-date (VTD) totals. You need to configure the flow.
Which feature should you use?

A. Parallel branch
B. Loop
C. Condition
D. Wait

Answer: B

Explanation:
In order to send a daily email that contains a list of year-to-date (YTD) totals, you would need to use a loop in the Power Automate cloud flow. A loop allows you to repeat a specific set of actions until a certain condition is met. In this case, the loop would be used to iterate through the data for each day, accumulating the totals for the year-to-date (YTD) and then sending the email at the end of the loop with the accumulated totals.
Here are some references from Microsoft that may be helpful in understanding how to use loops in Power Automate:

≫ Microsoft docs: Loops in Power Automate

≫ Microsoft docs: Repeating a flow with a loop

≫ Microsoft docs: Using the do-until loop in Power Automate

NEW QUESTION 74
- (Exam Topic 3)
You have a canvas app that contains the following text input fields: Id, FirstName, LastName. The app also has a button named Button1.
The OnSelect property for Button1 contains the following expression: Collect(People, {Id:Id.Text, FirstName:FirstName.Text, LastName:LastName.Text})
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statement	Yes	No
The People collection is automatically created if it does not already exist.	○	○
When Button1 is pressed, if a record with the current value of Id.Text already exists in the People collection, the values for FirstName and LastName are updated.	○	○
If you update the record in the Collection function to iclude the value from a new field named Age, it will result in an error.	○	○

A. Mastered

B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated
Box 1: Yes
If the data source doesn't already exist, a collection is created. Box 2: No
Note: The Collect function adds records to a data source. The items to be added can be:

> A single value: The value is placed in the Value field of a new record. All other properties are left blank.

> A record: Each named property is placed in the corresponding property of a new record. All other properties are left blank.

> A table: Each record of the table is added as a separate record of the data source as described above. The table isn't added as a nested table to a record. To do this, wrap the table in a record first.
Box 3: No Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-clear-collect-clearcollect

NEW QUESTION 75
- (Exam Topic 3)
A company deploys a chatbot that is embedded in a Power Pages website. The company has the following requirements for the chatbot:
• Azure AD users only must be able to use the chatbot when accessing sensitive data.
• The chatbot must be accessible only from the Power Pages website. You need to recommend a solution that meets the requirements.
Which two options should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Enable Manual authentication.
B. Set up a new channel for the chatbot.
C. Enable Only for Teams authentication.
D. Enable web channel security.
E. Configure a data loss prevention policy.

Answer: DE

NEW QUESTION 80
- (Exam Topic 3)
A company has a custom website.
You need to embed a Power Virtual Agents chatbot into the website. What should you use?

A. Webpage URL
B. Form ID
C. Bot ID
D. IFrame

Answer: D

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/publication-connect-bot-to-web-channels

NEW QUESTION 84
- (Exam Topic 3)
You create a new solution for a business process.
The business process includes uploading specific file types to a web service.
You need to ensure that the business process works the same way anywhere the solution is deployed. Which option should you use? To answer, drag the appropriate options to the correct configurations. Each
option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Solution system settings
For Power Apps in Settings > Customizations > Customize the System you can configure email and document management, activate or deactivate processes, and more.
Box 2: Environment variable
When should Environment variables be used? Some examples include:
When an input parameter needs to change across environments and should not be hard-coded. For example, a URL that points to a different resource in development and production environments.
If you're building a solution where your customer is required to provide an input value. Application setup pages.
Incorrect:
A connection reference is a solution component that contains information about a connector. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/advanced-navigation https://powerapps.microsoft.com/en-us/blog/environment-variables-available-in-preview/
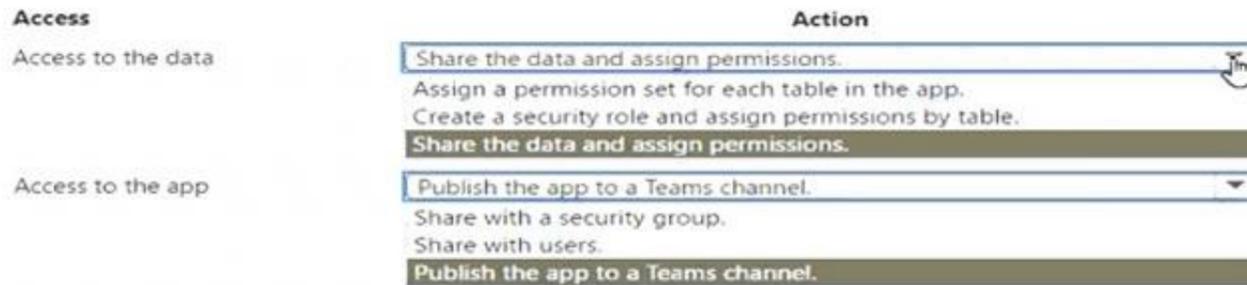

NEW QUESTION 86
- (Exam Topic 3)
A company creates a Microsoft Teams app that stores data in two tables in a Microsoft Dataverse for Teams environment.
Users require access to the app and the app data. You need to configure access.
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.
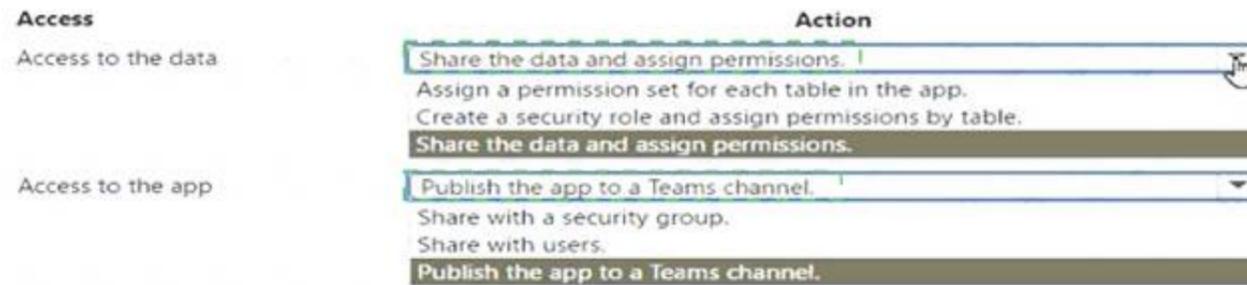

Answer Area

Access	Action
Access to the data	Share the data and assign permissions.
	Assign a permission set for each table in the app.
	Create a security role and assign permissions by table.
	Share the data and assign permissions.
Access to the app	Publish the app to a Teams channel.
	Share with a security group.
	Share with users.
	Publish the app to a Teams channel.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Answer Area

Access	Action
Access to the data	Share the data and assign permissions.
	Assign a permission set for each table in the app.
	Create a security role and assign permissions by table.
	Share the data and assign permissions.
Access to the app	Publish the app to a Teams channel.
	Share with a security group.
	Share with users.
	Publish the app to a Teams channel.

NEW QUESTION 91
- (Exam Topic 3)
A farm uses a canvas app to manage schedules for planting fields with crop seeds. The farm uses business intelligence to provide recommendations for schedule changes based on weather data.
You must implement a business rule that changes information for several forms in the canvas app based on business intelligence data.
You need to configure the business rule. Which scope should you use?

A. Table
B. All Forms
C. Form specific

Answer: A

NEW QUESTION 95
- (Exam Topic 3)
You are embedding a Power Apps visual in a Power BI dashboard. External customers must authenticate to have access to the dashboard. You need to configure the solution.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Set the Power BI service to authenticate users.
B. Use a table in the Power BI dashboard.
C. Publish to Power BI Report Server.
D. Set the Power BI service to allow anonymous access.
E. Share the Power Apps visual components with external users.

Answer: AE

Explanation:
Power BI uses Azure Active Directory (AAD) to authenticate users who sign in to the Power BI service, and in turn, uses the Power BI login credentials whenever a user attempts to access resources that require authentication. Users sign in to the Power BI service using the email address used to establish their Power BI account; Power BI uses that login email as the effective username, which is passed to resources whenever a user attempts to connect to data. The effective username is then mapped to a User Principal Name (UPN) and resolved to the associated Windows domain account, against which authentication is applied.
Reference: https://docs.microsoft.com/en-us/power-bi/enterprise/service-admin-power-bi-security

NEW QUESTION 96
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.
After marriage, Elisabeth changes her legal name to Elisabeth Mueller.
You need to update the sign in name for the user without losing any application history.
Solution: Delete the user account in the Power Platform admin portal and recreate the account by using the new name.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 97
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.
After marriage, Elisabeth changes her legal name to Elisabeth Mueller.
You need to update the sign in name for the user without losing any application history.
Solution: Ask the Microsoft 365 administrator to sign in to the admin portal and change the username. Does the solution meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 100
- (Exam Topic 3)
The business team provides the following list of features that they would like you to implement:
• Group by or sort columns in the current view.
• Configure a business rule to show an error message.
• Edit values in calculated fields.
• Edit the Address composite field.
• Use the editable grid on mobile phones.
Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Group by or sort columns in the current view.	Yes / No
Configure a business rule to show an error meessage.	Yes / No
Edit values in calculated fields	Yes / No
Edit the Address composite field.	Yes / No
use the editable grid on mobile phones.	Yes / No

NEW QUESTION 104
- (Exam Topic 3)
You are a Dynamics 365 for Customer Service developer.
You must trigger a mobile notification whenever a specific hashtag is posted from Twitter. The notification will send email to the company's social media teams distribution list.
You need to create a connection to the Twitter service and build a solution.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Sign in to the Business platform admin center and create a new project and connection set.
- Create a trigger to search for the new posts with the hashtag.
- Create an action to send a mobile notification.
- Sign in to Power Automate and create a new blank flow.
- Create a trigger to send a mobile notification.
- Select the social media connector, generate an authentication key from the service, and enter the key for the connection.
- Create an action to search for the new posts with the hashtag.
- Select the social media connector and enter the user credentials for the connection.

Answer Area

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions

- Sign in to the Business platform admin center and create a new project and connection set.
- Create a trigger to search for the new posts with the hashtag.
- Create an action to send a mobile notification.
- Sign in to Power Automate and create a new blank flow.
- Create a trigger to send a mobile notification.
- Select the social media connector, generate an authentication key from the service, and enter the key for the connection.
- Create an action to search for the new posts with the hashtag.
- Select the social media connector and enter the user credentials for the connection.

Answer Area

- Sign in to Power Automate and create a new blank flow.
- Select the social media connector and enter the user credentials for the connection.
- Create an action to search for the new posts with the hashtag.
- Create a trigger to send a mobile notification.

NEW QUESTION 105
- (Exam Topic 3)
A company creates a canvas app.
The app requires near real-time data from an accounting system that resides in a customers data center. You need to implement a solution for the app.
What should you create?

A. Azure DevOps pipeline
B. On-premises data gateway
C. Power Pages
D. Data integration project

Answer: B

Explanation:
When a company creates a canvas app that requires near real-time data from an accounting system that resides in a customer's data center, one solution that can be implemented is to create an On-premises data gateway.
An On-premises data gateway is a service that allows Power Apps to connect to and access data sources that are located on-premises, such as the accounting system in the customer's data center. The gateway acts as a bridge between the cloud-based Power Apps and the on-premises data sources, enabling real-time data transfer and integration.
References:

> https://docs.microsoft.com/en-us/power-platform/admin/gateway-reference

> https://docs.microsoft.com/en-us/power-platform/admin/gateway-onprem

> https://docs.microsoft.com/en-us/power-platform/admin/real-time-data-integration

NEW QUESTION 110
- (Exam Topic 3)
You are creating Power BI reports for a company.
A company that has a model-driven app wants to use Power BI reports within the app. You create the reports. You need to ensure that these reports are available within the app.
Which two actions should you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Share the Power BI report to all users.
B. Add the Power BI report to the Site Map dashboards.
C. Create a PCF file.
D. Use the native reports in model-driven apps.
E. Add the Power BI report to a dashboard in the model-driven app.

Answer: BE

Explanation:
Reference: https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/add-powerbi-visual

NEW QUESTION 114
- (Exam Topic 3)
You create a Power Automate flow as part of a managed solution. The flow alerts users when files are uploaded to a SharePoint location.
Files are uploaded to SharePoint at a much higher rate than expected. Users report that they receive too many notifications about uploaded files.
You need to stop the flow and correct the issue.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Action
Disable the flow in the managed solution	Disable the flow from the Power Automate portal ▼ Disable the flow from the Azure portal Disable the flow from the Power Automate solution
Verify changes to the flow	Run the Flow checker and then turn on the updated flow ▼ Use the Test feature on the updated flow and then turn on the flow Turn on the flow and then use the Test feature for the updated flow Run the Flow checker and then use the Test feature on the updated flow

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated
Reference:

https://docs.microsoft.com/en-us/power-automate/edit-solution-aware-flow https://docs.microsoft.com/en-us/power-automate/error-checker

NEW QUESTION 116
- (Exam Topic 3)
A company plans to implement AI Builder to add intelligence to several business processes. Each business process uses different sources and produces different outputs.
You need to determine which AI Builder model types to use.
Which model types should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Recognition requirement	Model type
Identify a person's age in a paragraph when written using the pattern **twenty years old**.	Entity extraction / Text recognition / Key phrase
Identify items and prices from an invoice.	Form processing / Text recognition / Object detection

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/ai-builder/form-processing-model-overview https://docs.microsoft.com/en-us/ai-builder/entity-extraction-overview
