Exam Questions ACP-620

Managing Jira Projects for CloudExam

NEW QUESTION 1

Newly created issues start in the to Do column of your Kanban board. The column has grown too full. Additionally, the team is unable to focus on the prioritized issues they should be working on. Which configuration change will help alleviate both problems?

- A. enable the Kanban backlog
- B. use card colors to distinguish priorities
- C. add the Priority field to the card layout
- D. create a quick filter

Answer: A

NEW QUESTION 2

You need a gadget which meets these criteria:
It can be based on Project and not just Saved Filter.
It provides a graphical view of the distribution of statuses in your project. Which gadget meets these needs?

- A. Activity Stream
- B. Filter Results
- C. Two Dimensional Filter Statistics
- D. Pie Chart
- E. Bubble Chart

Answer: D

NEW QUESTION 3

Teams using Project A and B currently use their own respective Scrum boards. They must now work together on the same products and issues and in the same sprints. You created a new Scrum board based on this filter: project in (A,B) ORDER BY Rank ASC
You must also check two settings to make sure the teams can access and use the new board. Identify the two settings. (Choose two.)

- A. application access of all team members
- B. global permissions of all team members
- C. availability of parallel sprints
- D. sharing on the board sub-filter
- E. sharing on the board filter
- F. project permissions

Answer: EF

NEW QUESTION 4

One issue type is always included in the same sprint as its parent issue. Identify it.

- A. Epic
- B. Story
- C. Task
- D. Sub-task
- E. Bug

Answer: D

NEW QUESTION 5

Your team needs a way to track a customer's location in a team-managed project. The location needs to match: a specific list of countries prohibit additional values limit to one selection
Identify the field type that meets this requirement.

- A. Checkbox
- B. Short text
- C. Paragraph
- D. Components
- E. Dropdown
- F. Labels

Answer: E

NEW QUESTION 6

Your team needs a new board that:
only shows issues that are actively in progress allows a separate area to prioritize incoming work allows them to release issues from the Done column
Identify the correct solution to meet these requirements

- A. Create a scrum board and enable the backlog!
- B. Create a scrum board and configure swimlanes.
- C. Create a kanban board and enable column constraints.
- D. Create a scrum board and configure a quick filter.
- E. Create a kanban board and enable the backlog.

F. Create a kanban board and configure swimlanes

Answer: E

NEW QUESTION 7

You work in a company-managed project, and your team needs a new field called Colors. Team members have to flag incoming issues using one or more colors and add new colors if the values don't already exist. Identify the custom field type that you should request from the Jira administrator.

- A. Labels
- B. Select List (single choice)
- C. Checkboxes
- D. Radio Buttons
- E. Select List (multiple choices]

Answer: A

NEW QUESTION 8

A user wants to add the label VIP to an issue when any member of the Executives group adds a comment to it. The configuration of the automation rule is shown.

Trigger	When: Issue commented	
Condition:	User condition	Reporter is in group Executives
Action:	Then: Edit issue fields	labels = VIP

The automation rule does not always execute as expected. What is the cause of the problem?

- A. The label VIP is not available in the issue's project.
- B. User condition has to be the trigger.
- C. A condition is missing to check whether the label is already set.
- D. User condition does not account for who is commenting.
- E. Issue commented has to be the condition.

Answer: D

NEW QUESTION 9

You shared a URL to the dashboard with Bobby but when he looks at it, the gadgets return errors that state, "The filter configured for this gadget could not be retrieved."

What is the most likely problem with the filters?

- A. They return issues from team-managed projects.
- B. They return issues with hidden fields.
- C. They are not shared with Bobby.
- D. They contain corrupt JQL clauses.

Answer: C

NEW QUESTION 10

Your team uses a company-managed Kanban project and needs a way to categorize issues as follows:
 group issues by the project phase in which work will be started
 assign a fixed start date and end date to each phase
 move unresolved issues to the next phase
 view reports of resolved issues by phase
 Which product feature should be used to categorize the issues?

- A. categories
- B. sprints
- C. components
- D. versions
- E. labels

Answer: D

NEW QUESTION 10
